■ SCHRACK SOLUTIONS FOR BUILDING EQUIPMENT

■ MOTION SENSORS

■ SCHRACK INFO

Motion sensors pick up thermal radiation invisible to the human eye and convert it into an ON/OFF switch function, without producing emissions themselves.

SCHRACK motion sensors are available in various modular- and wall-mounted designs, with different motion fields.

■ TOP TECHNOLOGY

**PASSIVE INFRARED (PIR) MOTION SENSOR** These passive infrared motion sensors can detect thermal radiation emitted from moving heat sources, such as people, animals, vehicles, etc.the PIR range can increase when used in low temperatures, and decrease in high temperatures **FLUSH MOUNTED MOTION DETECTION SYSTEM WITH INTEGRATED SENSOR** protection class IP 20 range: approx. 10m
