■ TEMPERATURE CONTROL UNITS

■ SCHRACK INFO

Save on energy costs by reducing the temperature of rooms not in use.

SCHRACK's modern control systems give you the best possible temperature control:

- electro-mechanic temperature control unitselectronic temperature control unitshygrostats used to control relative humidity in rooms with air-conditioning (offices and computer rooms), or to control the dehumidification of inside bathrooms, swimming pools or warehouses [BACK TO SCHRACK FOR BUILDING EQUIPMENT](#) [To top](#) [Print page](#)[Download PDF](#)
