PT MINATURE RELAYS/ DC/AC COILS

- universal application in control device and machine construction, e.g. heating and plant construction
With a switching current of 6A, the 4-pole version offers switch cabinets a power reserve of 20% versus comparable relays. Due to its reduced height, space in the switch cabinet can be used more efficiently.
MT TYPE MULTIMODE RELAY / DC OR AC COILS
for machine construction, plant construction
RM TYPE POWER RELAY / DC OR AC SUPPLIES
used for the direct switching of squirrel cage motors, hot-water tanks and night storage ovens or as a switching in series devices
