

AESTHETIC COMPLEMENTS THE FUNCTIONAL

Lighting is one of the best design elements for giving emphasis to buildings and surfaces. It allows us to enjoy our home more and to feel safer and more comfortable, both inside and out. Our LIGHTING TECHNOLOGY range gives you a vast and varied range of lighting solutions offering innovative designs and style elements.

“LIGHT IS A SYMBOL OF LIFE AND JOY”

Honoré de Balzac, philosopher

SCHRACK PAULE SYSTEM

A family of fittings with different shapes, versatile as far as their function and installation place are concerned. Suitable for footpaths, squares, gardens, commercial and residential areas, hotels, museums and archeological sites. These fittings contain one or more modules, each one with 4 power LED, cool white, last generation type; these can offer the highest efficiency and reliability comparing with the feeding system.

Each configuration can have different optics, symmetrical with beam 36° or asymmetrical wide beam 36° with alpha angle = 40°. The closure glass of the module has a RAL9006 grey colour serigraphy on areas without optical function. Body is extruded in aluminium alloy, while closing cap, optic and base, which is foreseen for outdoor installation on ground, are made of die-cast aluminium. For versions without base, installation is made by fixing an inner steel plate. After a chrome treatment the item is painted with polyester powders, grey colour RAL9006. The electronic ballast is included and fitting is supplied with a 1 m. cable.

A work of art created by the renowned Carinthian artist and designer H.P Maya,
realised with SCHRACK LIGHTING SOLUTIONS
