Flange plate for cable entry for DSI-Enclosure RAL7035

Light grey. Spare part: One piece is included in the DSI delivery

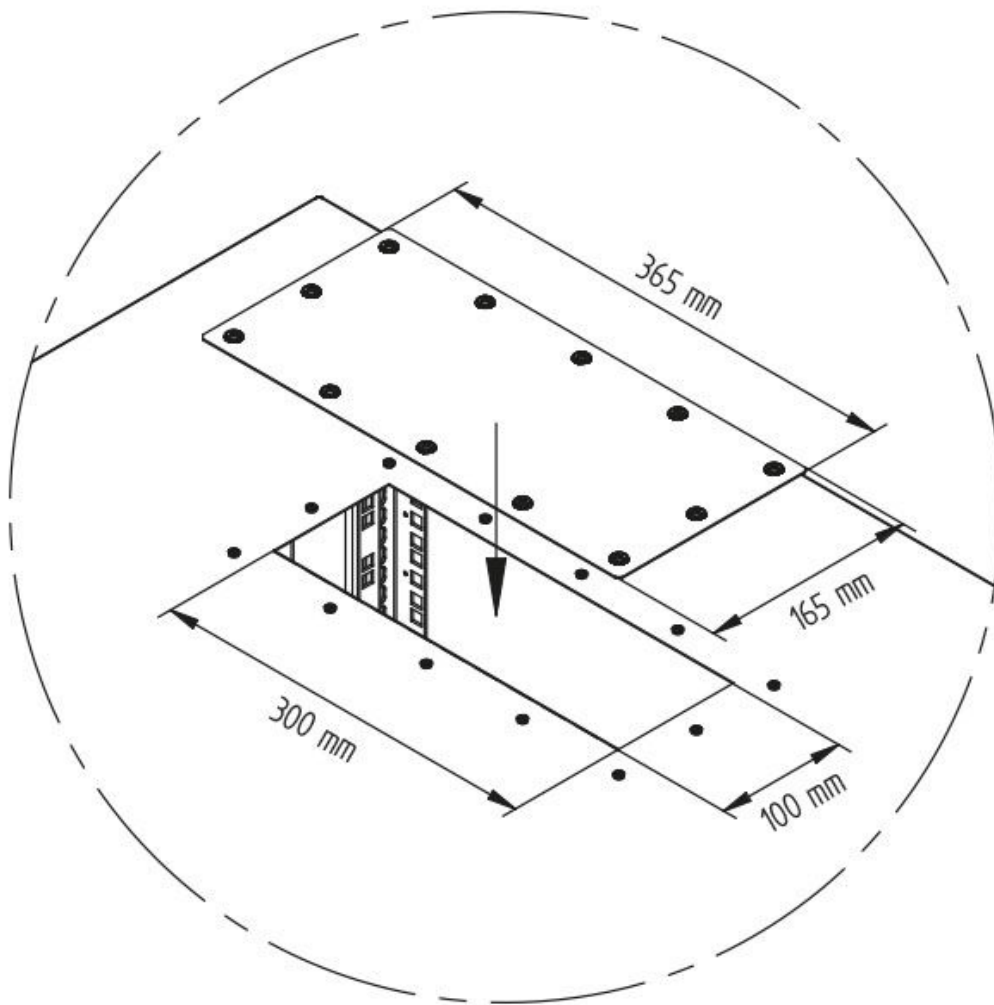

SCHRACK-Info

All cable entries in the IP54 enclosure DSI must be sealed against dust and moisture. Moisture entering the climate-controlled enclosure can condense, damage the installed components or freeze in the air conditioning unit. This can damage the air conditioning unit and put it out of operation. A flange plate for cable entry is therefore included in the scope of delivery of every DSI enclosure and is also available as a separate spare part.

Technical Data

Net length (mm)	365,00
Net width (mm)	165,00
Net height (mm)	50,00
Net weight (kg)	1,00
Min. ambient temperature (°C)	0
Max. ambient temperature (°C)	40
