

# Halogen-reflektorlamp GU5,3, 50W, 12° €ECONOMY

## Technical Data

|                          |                                      |
|--------------------------|--------------------------------------|
| Luminaire type           | lamp                                 |
| Make-up                  | Reflektor                            |
| Manufacturer             | 06-One Light                         |
| Cover                    | Clear                                |
| Beam angle (°)           | 12                                   |
| Operating voltage AC (V) | 12                                   |
| Operating voltage DC (V) | 12                                   |
| Light source             | Low voltage halogen - reflector lamp |
| Socket                   | GU5,3                                |
| Watt (W)                 | 50                                   |
| Light colour             | warm white comfort                   |
| Colour temperature (K)   | 2700                                 |
| Dimmable                 | TRIAC                                |
| Protection class         | III                                  |
| Energy efficiency class  | B                                    |
| LxØ mm                   | 44x50                                |
